

AVISHOCK™ Shock Track

Condition birds to stay away with low-profile electrified track that conforms to any surface.

Flexible and Adaptable:

Shock Track conforms easily to most building structures and shapes – ideal for signs, edges, ledges, sills, roofs etc.

Labor-Saving:

Avishock's special design utilizes snap connectors, reducing labor for an easy install – plus, it's virtually maintenance-free. The reduced-resistance copper conduction strips are protected from weather & dirt by a conductive plastic cover.

Almost Invisible:

Super low-profile (just 0.3" high) and available in four colors to match the structure, Shock Track is hard to notice close up, and virtually invisible from a distance. It cannot be seen looking up from below.

Long-Lasting:

Made from UV-stabilized PVC & high-grade metal conducting channels, Shock Track will be in service far longer than its five-year warranty.

Humane:

The intermittent shock is memorable, but does not hurt the birds; it simply conditions them to stay away, long-term.

Please see the Bird-X Installer Catalog for our full selection of Shock Track parts & hardware.

Coverage: Linear, may be cut to desired length.

Pests: birds (pigeons, sparrows, starlings, crows, blackbirds, grackles, seagulls, swallows and more), climbing animals and more

Usage: buildings/architectural: edges, beams, rafters, railings, signs, windowsills, gutters, perimeters, awnings, trusses

ROOST INHIBITORS
